Post-Procedure Care Instructions & Information

- Apply **frozen peas or ice** in a clean Ziploc immediately after treatment to **reduce swelling**! (particularly eyes)
- Keep a **very thin layer** of Vaseline, or Vitamin E, or Coconut Oil on the area at all times until flaking has ceased. **More is NOT better!** Apply a VERY THIN LAYER!
- You may moisten the area a few times a day with ice water and a small amount of antibacterial soap to keep it from crusting too much and to help reduce the possibility of infection. **Always reapply a very thin layer of Vaseline, Vitamin E, or Coconut Oil immediately after any moistening or washing.**
- You may use Bacitracin the first day. (**Do NOT use Neosporin.)**
- **Stay out of and away from all dirty, dusty or unsanitary environments** for the first few days after your procedure.
- **DO NOT EVER** pick, scratch or pull at the healing area as this will adversely affect your results and can cause scarring or permanent damage!
- After you have healed, **always use sunscreen on face, lips and brows**. Sun exposure will ALWAYS lighten and reduce the look of your permanent makeup.

☆☆☆ IMPORTANT ☆☆☆

If you experience any increased redness, swelling, or oozing after the first couple of days, immediately discontinue all products, clean with soap and water, lightly pat dry, and take Benadryl if you can. You may be experiencing an allergic reaction or infection condition. Immediately contact your technician or seek prompt medical attention if you suspect an adverse allergic reaction or infection.

☆☆☆ REMEMBER ☆☆☆

DON'T PANIC! The newly treated area will appear extremely dark, thick and overdone. If it looks normal to you, then you will want much more after it heals. The entire treated layer will slough off in 4-8 days average! Brow and eye color will continue to soften, but lips will appear too light at first, and will then regain their color in 2-3 weeks. I will **NOT** work on skin for a minimum of 4 weeks after your procedure because it may scar, bleed, and will be very painful. You **MUST** come back for your **FREE TOUCH-UP WITHIN 90 DAYS** for it to be free. Free touch-ups within the 90 day period apply **ONLY TO NEW FULL PRICE PROCEDURES** and **DOES NOT INCLUDE TOUCH-UPS AFTER 90 DAYS OR ANY OTHER REDO/REWORK**.

☆☆☆ IMPORTANT – READ THOROUGHLY AND INITIAL EACH ITEM ☆☆☆

- _____ Your one and ONLY free touch-up appointment MUST be scheduled within 90 days of your original treatment date. **NO EXCEPTIONS!**
- _____ After 90 days, but within one year of your original treatment, there is ALWAYS a **$95** fee PER AREA, PER PERSON. **NO EXCEPTIONS!**
- _____ Do not forget that your health, previous sun exposure, medications, skin type, hormones, thyroid conditions, and that understanding and following pre and post-treatment instructions will ALL directly affect the outcome of your treatment. ALWAYS!
- _____ After one year of initial treatment, all touch-ups will be **$150 to $225** per area and per session. There are NO EXCEPTIONS because all skin responds differently due to the numerous factors mentioned on the Permanent Makeup Procedure Consent Form you signed.
